

D6 Double Column Reading Order Probe

Left column paragraph A describes initialization order and expected first-column reading.

Left column paragraph B includes api/v1/resources and stable technical tokens.

Left column paragraph C ends before the right column should begin.

Right column paragraph A should follow the left column in a human reading order.

Right column paragraph B includes kubectl get pods and <https://example.com/docs>.

Right column paragraph C makes ordering issues visible during manual review.
