

D6 Plain Text PDF Probe

This fixture checks ordinary text extraction from a born-digital PDF. It includes multiple paragraphs so the conversion has real reading content.

Project URL: <https://example.com/transagent/d6/pdf-probe?case=plain>

Command: `python3 -m pytest tests/test_pdf_probe.py -q`

Page 1 repeats enough text to make the page non-empty and easy to inspect after LibreOffice rendering.
